

FALL PREVENTION IS THE BEST PROTECTION

How Do You Keep Everyone OSHA Compliant When You Can't Watch Them?

Take the Option of OSHA Compliance Out of the Hands of Your Workers

Use Guardrails & All Workers Are Fully Covered

- No Involvement or Training Needed by Individual Laborer
- No Adjustments or Personalized Fittings
- No Lines or Ropes for Tangles
- No Memory Lapses or Improper Tying-off

Clearly Seen From the Street

- You Can Quickly Know If Everyone Is Complying
- **Inspectors Prefer Guardrails**

OSHA eTool Says: "In general, it is better to use fall prevention systems, such as guardrails, than fall protection systems, such as safety nets or fall arrest devices..."

Reduce Costs

- Unlimited Useful Lifetime—Require Almost No Maintenance
- Not Damaged by Sun or Weather
- Limit Controlling Contractor Citations
- **Help Adjust Your Workers Compensation Modifier**

Stop Someone Before They Fall

- No Lost Work due to Harness Injury
- No Recovery Plan Needed

**Don't Let Someone Take Their Life
& Your Livelihood In Their Hands!**

ACRO SOLUTIONS FOR ANY ENVIRONMENT

RESIDENTIAL GUARDRAIL SYSTEM

- TWO Brackets; one solution: #12070 for Eave Edges & #12075 for Rake Edges
- Interleaves with shingles: Nails On & Taps Off (just like roof brackets)
- Tested in a lab to meet OSHA's 2011 regulations

PARAPET CLAMP GUARDRAIL #12090

- Individual units can be moved without disassembly of the whole system
- Adjusts to wall width from 4" to 24" wide
- Post is Height Adjustable for use on lower and higher parapets

FLAT ROOF #12060 & VERTICAL #12045 GUARDRAILS

- Screw, Bolt or Weld to almost any surface
- Ideal for protecting workers from any hole, opening or edge

RESIDENTIAL GUARD RAIL
#12070: EAVE & #12075: RAKE

PARAPET GUARD RAIL #12090

GUARDRAILS #12045 & #12060
